# High performance inlet works... we know what it takes:

## **SAFETY**

Our first class safety management systems are accredited to OHSAS18001. We demand the highest standards from our employees and suppliers to identify hazards and unsafe conditions taking action immediately and to report concerns. What's more, we actively support ongoing and continuous improvements in safety observation, training, work practice, procedures and safety policies.

## **RISK**

Our experienced teams manage risk effectively when installing new or maintaining existing inlet equipment. We believe that risk management is a dynamic process and we work hard to deliver a proactive practice of managing all workplace risks including regular assessments.

## **RELIABILITY**

Jacopa inlet works equipment is designed by experts who have substantial experience based on many years of equipment installation and operation by our customers. Our deep understanding of the features and specifications of equipment enables us to meet or exceed customer requirements over the equipment design life expected by the industry. Our know-how is your peace of mind.

## **EQUIPMENT**

We offer a one stop shop for inlet works equipment including Individual Coarse Screens, Individual Fine Screens, Screenings Handling, Packaged Inlet Works Screens, Grit Removal & Treatment Systems and Package Grit Plant

## **SPEED**

We aim to deliver on time every time measuring our performance against our own challenging targets. Our dedicated aftermarket parts and service team quickly and efficiently respond to your needs keeping equipment optimally maintained to give of its working best and we understand the operator's need to bring inlet equipment into service quickly. And when it comes capital equipment our investment in standardisation means we are often able to improve on quotation times and equipment delivery times, standardisation also supports operators improving ease of maintenance and parts availability.

## **COMPETITIVE**

You'll find us competitive at every turn consistent with our priority on safety and reliability. We continually evaluate and determine what constitutes best value to our customers to deliver outstanding return on investment on your equipment, solutions, service and projects.
