

Protecting your assets

Wastewater treatment works can be severely disrupted if vital assets are damaged by debris.

Bosker trash rakes from Jacopa are the first line of defence for expensive pumps, screens and associated treatment processes. They perform the work of a trash rake, conveyor and debris loading system all-in-one to substantially reduce costs.

- Low maintenance
- Robust
- Cost efficient
- Excellent service
- Economic operation
- Sturdy design
- Retrofit into existing channels
- Over 1100 installations
- Optimise Totex

Low-profile 'Bandit' range for smaller scale installations
