

FREE HEALTH CHECKS

For your grit plant

Jacopa is offering free 'health checks' for your grit plant.

We'll identify the need for any maintenance and optimisation required and where appropriate make recommendations to ensure your systems are achieving desired treatment outcomes.

- Reduce wear on vulnerable, expensive equipment.
- Save money and reduce environmental impact.
- Avoid long periods of costly downtime for repairs.
- Reduce problems with downstream treatment works processes.
- Increase energy efficiency and reduce carbon footprint.
- Optimise treatment outcomes.
- Raise operator awareness of correct set up

Don't risk it. Ineffective grit removal can have a serious impact on your entire treatment works resulting in equipment failure, costly grit removal and reducing the efficiency of your entire works.
