

# Raking in Resilience

**Bosker builds-in asset resilience from the outset by removing debris effectively.**

Bosker trash rakes from Jacopa are the first line of defence for expensive pumps, screens and associated treatment processes. They perform the work of a trash rake, conveyor and debris loading system all-in-one to substantially reduce costs.

- Low maintenance
- Robust
- Cost efficient
- Excellent service
- Economic operation
- Sturdy design
- Retrofit into existing channels
- Over 1200 installations
- Optimise Totex

Low-profile 'Bandit' range for smaller scale installations
