

Delivering what you need - NOW

As usual, Jacopa is taking the lead by delivering timely solutions to some of the wastewater industry's most pressing challenges.

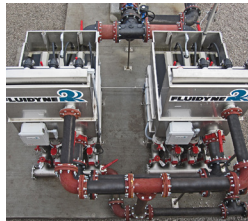

▲ FLOW CONTROL

Steinhardt's 'HydroSlide' provides highly accurate flow regulation of foul and surface waters, giving a constant discharge through the required head range with certified performance.

► PHOSPHORUS REMOVAL

Fluidyne FFP™ Cloth Media Plate Filters are the ideal solution for high performance, cost-effective phosphorus removal in wastewater treatment works, and have a wide range of further applications.

► PRIMARY TREATMENT

The high efficiency Soby self-cleaning Belt Filter replaces conventional primary treatment of municipal wastewater and sedimentation processes and delivers the benefits of a smaller footprint with a significantly reduced investment.
